

DIY Snowflake Washer Ornament

INSTRUCTIONS

Step 1: Layout

1. Place the 1/2" center washer upside down on your work surface. This forms the foundation of your snowflake.

Pro Tip: Draw a circle guide on your protective paper to help with even spacing.

Step 2: Inner Ring

2. Arrange six 1/4" flat washers evenly around the center washer's perimeter. Don't glue yet - ensure spacing is perfect.

Step 3: Middle Layer

3. Place 7/16" AN 900 Series washers slightly underneath each 1/4" washer to create depth.

Step 4: Outer Layer

4. Position 5/16" AN 900 Series washers on top of the 7/16" washers, overlapping slightly toward centers.

Step 5: Assembly

5. Once satisfied with placement, glue washers starting from center and working outward. Allow to dry completely.

Step 6: Center Detail

6. Flip snowflake over and glue brass washer to center. Let dry completely.

Step 7: Add Sparkle

7. Glue diamond gems to cover entire snowflake surface. Work in small sections for best adhesion.

Pro Tip: Use tweezers for precise gem placement and clean lines.

Step 8: Finishing Touch

8. Once fully dry, thread gold ribbon through an outer washer and tie a bow for hanging.

Difficulty Level: Easy

Time Required: 45 minutes (plus drying time)

Cost: Under \$20

MATERIALS LIST

Washers:

- 1 - 1/2" Stainless Steel Flat Washer (center)
- 8 - 1/4" Stainless Steel Flat Washers
- 8 - 7/16" Stainless Steel AN 900 Series Flat Washers
